VOLUME TEN

STONY PLAIN, ALBERTA THURSDAY, SEPT. 19, 1929.

Whole Number 476

The 1930 McLAUGHLIN -BUICK

*Power that says
"follow the
leader" to any
car on the road*

Outstanding among the many improvements in the new McLaughlin-Buick is the marked increase in power provided by the new McLaughlin-Buick valve-in-head engine.

This great new engine develops 98 horsepower in the 124 and 132-inch Series, and 80½ horsepower in the 118-inch Series, thus assuring superabundant reserve for every motoring need.

This tremendous increase in power, together with innumerable refinements bearing on other phases of engine operation, not only endow the new McLaughlin-Buick with unrivalled acceleration, hill ability and speed, but impart marvelous new flexibility, and velvet smoothness at any pace . . . without any increase in fuel consumption.

See the new McLaughlin-Buick today! Compare the beauty of its new Bodies by Fisher. Test getaway, speed, power on hills, smoothness, flexibility! Then you, too, will acclaim McLaughlin-Buick the world's greatest motor car value.

Buick-Pontiac Motors. Stony Plain.

A Hit-and-Run Driver.

That the narrow grades on the Baseline curves have another accident to their credit is shown by the report of what occurred when Mr F Askin of Caryl, driving car No. 80337, was motoring to Stony the other day, with his wife and family. Approaching the gateway of Mr John P Fuhr, Mr Askin became aware of a motor car behind whose driver wished to pass. Fuhr pulled over to his right but apparently had not moved quick enough, as the first thing the occupants of Mr Askin's car knew they had received a most energetic bump sideways and were pushed over the edge of the grade. The bumping car, No. 50539, was driven by Mr Comerelinsky of Wabamun. This driver was in a hurry to see a gentleman friend in the City, and is said to have driven away without making any inquiry as to damage done. As Mr Askin's car was struck where there is a stiff grade of about 18 feet, the occupants had to climb out and stand on the port side, to keep the car from toppling over. Mr Fuhr pulled the car back on the road with his tractor.

Mr Comerelinsky was fined \$5 and costs for furious driving, \$15 and costs for failing to return to scene of accident, and had his driver's license cancelled for six months. He had already made a private settlement with Mr Askin for damage done his car.

Looked At from a New Angle

Red Deer Advocate: The Advocate has its serious doubts as to the absorption of so many town utilities, and the institution of so many town utilities by the Calgary Power Co. Not alone has it purchased a number of electric light plants as well as supplying "juice" wholesale as at Red Deer, but it is also dealing in regard to water service plants as at Camrose, Wetaskiwin, Lacombe and other towns, and it may tackle sewer systems. The Alberta government has the telephone system of the province, bar Edmonton city with which it is negotiating, and the Advocate hopes that, before long, when the natural resources are returned to the province next year, and the Spray Lakes power deal comes thru, that the government will buy out the Calgary Power Co. so that all public services and utilities shall be in municipal and provincial hands, so far as possible.

The Progress of Little Things

In these modern days when it is "the thing" to boast about the bigness of this and that, and when countries and cities lay claim to the possession of the biggest of something or other, we are apt to forget how many of these "big" things were brought about, and to lose sight of the essential fact that anything "big" is in reality only a collection or combination of many very small things.

Nowadays not so much stress is laid upon old sayings of a couple of generations ago, such, for example, as "Mighty oaks from little acorns grow!" nor do we stop to contemplate that this globe on which we live is after all made up of "little drops of water, little grains of sand."

It would be better for everyone of us if we gave greater heed and attached the right importance to the little things of everyday life. The wealth of the multimillionaire is, after all, only an unusually large accumulation of pennies, and some of the very rich men of the world laid the foundation of their wealth by careful saving of their pennies. The hundreds of millions of bushels of Marquis wheat harvested in Canada every year is the result of one little kernel developed by Dr. Saunders.

The investment of a very few dollars by the parents of a baby at the time of its birth, if left to accumulate at compound interest throughout the years of its minority, would mean a very substantial sum of money upon which to commence a career in the world by the time the child became of age.

These thoughts come to us when reading a recent article about Trinity Church, in New York City. This church, which stands at the head of Wall Street, the centre of New York's financial district, began its career 233 years ago on a precarious income derived from the flotsam and dead whales cast up by the sea along the shore where one of the world's largest cities now stands. Today Trinity Church Corporation is one of the largest holders of real estate in that city, owning \$15,000,000 of revenue producing real estate, bringing into the church coffers almost \$1,500,000 a year. Nor do these large figures include the value of the property upon which Trinity Church itself stands, the equivalent of about two square blocks in the heart of the financial district, and conservatively valued at another \$15,000,000.

The tremendous wealth of Trinity, we read in the Wall Street Journal, would appear fantastic to the organizers of this church in 1696, when King William III. made the original grant of land to the parish, supplemented nine years later by a further grant from Queen Anne. In those days the line was of no particular value, Wall Street was non-existent, and Fifth Avenue not even a foot path. But Manhattan Island was destined for great wealth, and the worthless property of a little over 200 years ago is worth many millions today.

Historical records contain efforts to obtain funds to start the church, which appear incredible when contrasted with present day values. One aid to the building of the original church in 1696 was a patent issued by the Governor of New York. It permitted vestrymen to seize all drift whales, or anything else driven by the sea onto land, and for which there was no owner. It further directed that the whales be towed ashore, fried, and proceeds used for a building fund.

The lesson of this interesting bit of history is this: Today there are thousands of young people just starting out in life. They have little or nothing. With them it is indeed a day of small things, and as they look around them and see so many huge undertakings, great enterprises, and the speed of the modern world, they are inclined to be discouraged, and become obsessed with the false idea that there is no opportunity for them.

But opportunities exist today as never before. There are a thousand today where there was but one two hundred years ago. The beginning must be small now, as it was then, but the opportunity is there just the same while the possibilities and probabilities of growth are many times more rapid now.

Tackle the small thing at once; save the small things, the pennies; watch for and embrace your opportunities; conserve those things which come to you. The bigger things and the rewards of work and of service to your fellowmen will follow in due course.

Firebrick and Fireclay Products

Firebrick and fireclay shapes are produced, both from domestic and imported clays, in Nova Scotia, Quebec, Ontario, Saskatchewan, Alberta, and British Columbia. Refractory silica bricks are also produced in Nova Scotia and Ontario.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes the acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia, prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Story of Privation

Tragic Case Of Two Boys Lost In Woods Of Northern Quebec

How 12-year-old Michael Courtois remained for nearly two months beside the body of his brother, Rene, 19, dead from hunger and privation in the woods, and how the two of them had wandered for miles, famished and helpless, was described at Roberval, Quebec, at the inquest into the death of Rene Courtois, found dead in the woods of northern Quebec, after having been missing since August, 1928.

Roots, berries and fish bones furnished slender means of livelihood for a time, young Michael told the coroner's jury. They were four hundred and fifty miles from Roberval, the nearest outpost of civilization. Having but two matches, they kept a fire burning in a pall for two months. When the search party found them, the fire was still smouldering but Rene Courtois was dead.

Michael had almost completely lost his reason when rescued, but it is now completely restored, though he is a physical wreck.

The boys were lost when their father left them in his cabin while he undertook a hunting trip. They wandered from the camp.

The coroner's jury returned a verdict, "death by starvation and misery."

FEELING WORN OUT

When the Blood Becomes Watery a Breakdown Follows

How many girls and women suffer from headaches, pain in the back or side, poor appetite, nervousness and a constant feeling of weariness and exhaustion of the heart at the least exertion. Of course, all these symptoms may not be present in any one case, but any of the show that the blood has become thin and watery, and good health can only be regained by enriching the blood. "This should be done without delay. For this purpose nothing else acts so promptly as Dr. Williams' Pink Pills. Every dose helps to enrich the blood and tone weak nerves and thus brings new health and vitality to weak, and often dependent people. The truth of these statements is proved by the case of Mrs. Howard King, R.R. 5, Truro, N.S., who says: "A couple of years ago I grew so weak I could scarcely walk across a room without help. My blood was thin and I was almost breathless. I had taken Dr. Williams' Pink Pills on a former occasion with good results, and so decided to try them again. By the time I had taken a few boxes I felt much better, but I continued taking the pills for several months, by which time I was well for miles with little effort. I do all my own housework and care for four children, and you will see what Dr. Williams' Pink Pills have done for me."

You can get these pills through any medicine dealer or by mail, post paid, at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Gratifying Progress In Tree Planting

The 1928 reports of inspectors of the tree plantations made on prairie farms with trees furnished by the Forest Service of the Department of the Interior from their nurseries at Indian Head and Sutherland, Saskatchewan, show that 83 per cent. of the plantations inspected were found to be in very good condition, 14 per cent. were fair, and only 3 per cent. were in poor condition.

Rub It In For Lame Back. — A brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

Alberta Calves For Dakota

Alberta's Flying Rancher Receives Order From North Dakota State University. George Ross, southern Alberta's flying rancher, has received an order from North Dakota state university for 1,000 calves to be distributed by the university to boys' and girls' baby beef clubs throughout the state as part of a movement to encourage more and better livestock production.

The calves will be delivered during October, and after distribution, will be fed up during the winter for spring stock shows in North Dakota.

Kill that corn with Minard's Liniment.

W. N. U. 1928

The Most Beautiful BLACK you have ever seen

"THE most beautiful black you've ever seen!" "All my friends admire my new black silk!" "The coat I thought was hopelessly spotted is now a new, beautiful black!" These are typical comments from women who have used these true, jet black dyes.

Diamond Dyes Black never gives cloth a greenish or brassy look, as so many black dyes do. Like Diamond Dyes Red and all the other Diamond colors, it is easy to use and gives such beautiful results because it is rich in pure aniline. It's the aniline in dyes that give them brilliance, depth and fastness; make them go on smoothly and evenly, without streaking or spotting. And Diamond Dyes contain the highest quality aniline that money can buy. The white package of Diamond Dyes is the highest quality dye, prepared for general use. It will dye or tint silk, wool, cotton, linen, rayon, or any mixture of materials. The blue package is a special dye, for silk and wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

Diamond Dyes

Sun Proof

EASY TO USE—BETTER RESULTS

Diamond Dyes contain the highest quality aniline money can buy. And it is the aniline that counts. They are the life of dyes; the source of their rich colors; brilliance and permanence.

Ontario Research Foundation

Saskatoon Professor Will Go To Toronto To Engage In Research Work.

Dr. Seymour Hadwen, research professor of animal diseases at the University of Saskatchewan, will leave Saskatoon for Toronto shortly for the Ontario Research Foundation as director of veterinary science. This foundation is subscribed to jointly by a number of commercial firms in Ontario, and the Ontario Government. The chairman is Sir Joseph Flavelle.

Dr. Hadwen, who has been in charge of the veterinary research at Saskatoon since the laboratory for this purpose was opened, comes from Manchester, England. His research work on the effect of sunlight on white animals and the susceptibility of white cattle to attacks by parasites have attracted attention among scientific men and stock breeders. He has also made interesting discoveries with regard to the cause and method of the change of colour of the fur of wild animals in winter.

Sunday Work In Russia

Sunday was abolished as a regular day of rest when the Soviet Government recently inaugurated in scores of trades and institutions a new "continuous production week." Employees will have their regular hours and rest-day, but work will be carried on continuously by others.

Population Of Australia

Commonwealth Statisticians Show Increase During the Past Year

The population of Australia at December 31 last, was 6,336,786, an increase during the year of 1928, of 101,932, according to figures compiled by the Commonwealth statisticians. The corresponding estimate for New Zealand was 1,466,952, showing an increase of 16,862.

The state of New South Wales has a population of 2,455,280; Victoria state 1,760,689; Queensland, 916,689; South Australia 579,348; Western Australia, 406,873; Tasmania, 216,563.

The population of the six capital cities of Australia now totals 3,015,248.

Blood passes through the heart at a rate of about seven miles an hour.

Boils

Dry up boils with Minard's. It's antiseptic qualities kill the poison and draw out inflammation.

Cut Down Food Wastage

---by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

HUNTER-MARTIN & CO., REGINA, SASK.

Group of Canadian Scientists To Study Resources of Frontier Districts To Aid the Pioneer

Considerable interest has been aroused here of late and throughout the continent of Europe in the settlement of Western Canada, says the Monetary Times and continues: Government circulars, railway advertisements, and British newspapers interested in the "New West" devote much space to picturing Canada as a land of opportunity. Wealth is represented as awaiting the daring European emigrant on the very threshold of Canadian soil. He learns that expansive prairies and great tillable plains await his plowshare and will insure him affluence and power. Disillusioned by these circular advertisements the believing immigrant has his hopes smashed by the outlook of frontier life. His new Canadian home is hewed out in an atmosphere that is full of disappointment.

The Canadian Government has brought many new settlers to Canada under the "assisted immigrant" plan. It is hoped that these families will settle on Canadian farms or will courageously dare the hardships of pioneer life. But in any case they are supposed to be agriculturists primarily.

A very distinct contribution toward improving the lot of the pioneer and gaining a more authentic knowledge of the location and resources of our frontier districts is being made by a group of Canadian and American scholars. The National American Research Council and Geographical Society have attempted a very comprehensive program. They hope to make a statistical and historical survey of the fringes of civilization, especially the pioneer belts. The plan is outlined by its farmers as follows: "A pioneer belt is a region of recent, progressive or potential settlement. In this study emphasis will be laid upon agricultural settlement, as well as the preceding forms of exploitation, lumbering and mining. The regions of primary interest are those possessing resources sufficient to support a socially tolerable and economically efficient population. The geographical focus is the temperate zone of either hemisphere and such sub-tropical areas as approach to a temperate zone climate."

The first region to be studied is that of Canada, supposedly because it is the most accessible. The study of this area aims to appraise its natural resources, to study methods of settlement with due regard to avoiding wastage of life and capital, and to trace the successive stages of utilization of natural resources and the resultant effects on economic and social institutions.

This phase of the project has been turned over entirely to an all-Canadian pioneer problems committee of which Dr. W. A. Mackintosh, professor of political and economic science, Queen's University, Kingston, has been named director. Other members will include: Dean W. J. Rutherford, University of Saskatchewan; Professor Chester Martin, Professor D. A. Macdibbon, University of Alberta; Professor D. A. McArthur, Queen's University; Professor C. A. Dawson, McGill University; and Professor R. W. Murchie, Manitoba University.

The research conducted by these experts will fall into four categories: Physical conditions (climate, topography and soil), agricultural econo-

mics (farm management and soil fertility), progress and utilization of land and machinery; history and economics, and social structure. Their studies will cover the whole pioneer area of Canada, although concentrated on separate regions. The area is conveniently subdivided thus: (1) Quebec clay belt, (2) northern Ontario clay belt, (3) northern Manitoba, (4) southwestern Manitoba and southeastern Saskatchewan, (5) northeastern Saskatchewan and northwestern Manitoba, (6) prairie belt (i.e., the dry belt), including irrigated regions, (7) park belt, (8) forest soil areas, (9) Peace River country, (10) foothills and ranching country (also ranching areas in British Columbia and Saskatchewan).

Although it is not intended to seek government aid, the Prime Minister and his Cabinet may be ready to co-operate with handsome grants to cover the more expensive stages of this project. Such disinterested and scientific study of man's relation to his environment and in general and with particular emphasis on the Canadian situation ought to win the enthusiastic approval of all who are interested in the destiny of this great Dominion.

Winnipeg Newspaper Union

DRAPED FLAIRE
A new silhouette for the youthfully smart woman. It shows the raised waistline, a chic detail in all Paris frocks. The circular skirt in diagonal movement is draped at left side which is suggestive of wrapped treatment. Style No. 566 combines printed and plain cotton voile, the popular summer fabric. It comes in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. The deep slender hip-line, makes it suitable for the larger woman, by placing the circular fulcrum low. Chartruese green chiffon, printed red, crêpe de chine, yellow handkerchief linen, orchid and white printed lawn, purple aster georgette crêpe, printed rajah in capucine tones, and sky-blue sheer lace are distinctly smart combinations for this charming afternoon mode. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Rats Spreading Westward

Precautionary Measures Are Advised To Check Advance Of Vermin

A matter of fifteen years ago rats had become a major nuisance in the Red River Valley. They seemed to come from the south, and the United States, where the annual damage from rats is estimated at \$200,000,000; got the blame for the invasion. For some mysterious reason the rat menace vanished. There are still rats in the province, but the trouble they cause is relatively slight. Now it is Saskatchewan that is complaining.

The rats are moving westwards across the neighboring province. Four years or so ago rats were only found east of the line through Lampman, Broadview, Springfield and Prosserville. At the end of 1928 they had reached Regina, Willowbunch, Langens and Watson.

It is the rat that spreads the bubonic plague, and precautionary measures are being advised to check the spread of the vermin. Modern farm buildings on concrete foundations are ratproof, and by means of screening low-level windows and chimneys much can be done to keep them out. It is worth while taking such measures everywhere to prevent them getting a hold.—Manitoba Free Press.

Fish Meal For Stock Feed

R.C. Product May Be Shipped To Prairie Provinces

As a means of building up the health of Western Canadian cattle, the British Columbia Government is discouraging the use of fish meal as feed. The fish meal is manufactured from pilchards which are caught in millions off the west coast of Vancouver Island.

According to Hon. S. L. Howe, commissioner of fisheries, it has been shown that herds fed on a ration of fish meal had at the end of a year an average height of two and a half inches in excess of the standard, and an average weight of 30 pounds in excess of the standard weight. He added that herds fed on a ration of fish meal are free from gaiter and abortion, and that cases of bovine tuberculosis are relatively unknown among cattle so fed.

May Soon Need Certificate

The time is coming when the motorist who applies to renew his license will have to present a certificate from an approved garage to show that his car has been inspected and found in good shape. Until there is some such safeguard there will not be a proper assurance that the highways are safe from an unnecessary source of danger.

Eternal triangle—love, marriage and divorce.

Promising Future Is Predicted For Port Churchill, Soon To Be Centre of Great Activity

Alberta Crops

Forty Bushels To The Acre Reported In Peace River District

Those who have supposed that there were no good crops of grain in Central Alberta this year, will be interested to learn that a Wetaskiwin farmer, Mr. Gustave Elgert, has been awarded the provincial championship for the finest field of wheat in the province. A day or so ago Premier Brownlee told us that there are crops in the Peace River district which are calculated to yield 40 bushels to the acre. Last week a report from the south stated that in the extreme southwestern corner of the province yields running up to the same figure were expected. The field crops competition in which Mr. Elgert won was open to entries from any part of the province, and entries were actually made in districts all the way from the Athabasca River to the international boundary. To win under these conditions the prize field must have been good, not only by comparison, but by the standards which apply in a normal season.—Edmonton Bulletin.

Railway Accidents Reduced

Reduction Of Fifty Per Cent. Is Noted In Last Four Years

In the past four years the railways of Canada and the United States have decreased accidents by 50 per cent. according to figures brought out at the sessions of the American Railway Association safety section, Canadian branch, which have just closed at Montreal. Four years ago the railways set themselves the goal of cutting accidents 35 per cent. by 1930.

In a year less, they have accomplished 50 per cent. "The railways," a speaker said, "are doing their part. The public is being educated too, but there are still too many people who insist on being negligent."

"Unless the public co-operates and learns the rule of 'safety first' we must still have accidents, no matter to what lengths we go to protect."

Dear Old Lady (at village grocer's): "Young man, I should like to try a pound of traffic jam—there's been so much about it in the papers lately."

She—I wonder why they put corn meal on the dance floor.

He—Oh, that's to make the chickens feel at home.

C.N.R. OFFICERS PROMOTED

Officers of the freight traffic department of the Canadian National Railways prominently concerned in the recent retirements and promotions are shown above. They are: (1) J. M. Horn, who has been promoted Assistant Freight Traffic Manager, Winnipeg; (2) J. M. Macrae, who has been appointed General Freight Agent, Vancouver; (3) W. Halsey, who becomes General Freight Agent, Winnipeg; (4) A. E. Stoenes, General Freight Agent, Winnipeg, who, on Dec. 15th, retired after 52 years of service; and (5) F. G. Adams, Assistant General Freight Agent, Winnipeg, whose duties are enlarged to give him supervision over rates and divisions.

Colonel Dubuc, chief engineer of the Department of Railways and Canals, and D. W. McLachlan, engineer in charge of the Hudson Bay Ter-

minals, have returned to Ottawa from a tour of inspection of the railway and harbor works at the Bay. The engineers report excellent progress, although they say the port will not be ready for business for two or three years. Nevertheless Churchill is attracting residents, and already three of Canada's leading banks have established branches there. Furthermore, every time a report goes out of progress on the railway, there is a rush of barbers, bakers and other workers to the new port. There are 2,500 men at work on the railway line and 500 at the harbor, making a community of quite respectable size. The idea Churchill is a forbidding centre for settlement is disappearing. Last winter, work was pursued on the railway, although the thermometer went down to 50 or more below zero at times. The men engaged were hardy pioneers, and on the railway they are building, the workers and small business men of the future town will ride in comfort to the new port. Cold in winter and extreme heat in summer do not deter settlement in Canada's north; witness the Yukon, far to the northwest of Churchill, where Dawson is a happy community, many of whose dwellers live in flower-covered houses and drive their motor cars over highways that were a quarter of a century ago foot trails to the gold-laden creeks of the Klondike.

Dominion of Canada maps show that gold is located in many sections south of Churchill, and iron and coal and other minerals. Big and small fur-bearing animals abound, the caribou being much in evidence; water powers are awaiting development and there are areas of pulpwood, all marked on the map. Polar bears may swim about among the icebergs right down to where the port works are in progress and whales blow and wallow at the front door, as it were, but there are other more promising signs not far inland. The lakes and rivers of the region teem with fish, and the Indians make a living with the Red Men's minimum of effort. United States and Canadian experts declare that colder weather has been experienced in the centre of Manitoba and as far south as Montana than in Arctic Circle, which is much farther north than Churchill. Stefansson insists that away up in the Arctic, where vast islands and many seas are in evidence, a man may exist comfortably—that the Arctic is friendly, in fact. However that may be, it is certain that Churchill is due to become one of Canada's northern communities, and that neither extremes of cold nor heat will keep adventurous spirits from going there in search of a livelihood. Settlement is moving towards the northern boundaries of the provinces whose territories stretch towards the Arctic regions, from Quebec to British Columbia.—Montreal Gazette.

Anxious Father (to friend): "I can't make our Tom out. He's a funny lad. I've taught him all I know and now he knows nothing."

"So you won first prize in the lottery? How did you come to choose No. 29?"
"I chose the number corresponding to my age."
"I must try that."
"I wouldn't in your case—No. 39 never wins."—Karikaturen, Oslo.

REPRESENTATIVE HEALTH EXHIBIT

CO-OPERATION WITH THE DEPARTMENT

180,000 CANADIANS TELL TO-DAY!!
11,500,000 LIVES ARE SAVED THROUGH HYGIENE IN 1929

The most representative health exhibit ever shown in Canada was a recent feature of the Canadian National Exhibition, when the Ontario Government provided space in its excellent show for leading voluntary health societies. Above is shown the Canadian Social Hygiene Council booth designed by Dr. C. P. Fenwick, of Toronto. Other agencies given space by the government were the St. John Ambulance Association, Victorian Order of Nurses, Child Welfare Council and the Red Cross.

Visit Of Sir John Martin-Harvey

Again Coming To Canada With Three Well-Chosen Plays

Who will ever take the place Sir John Martin-Harvey has won for himself in his many visits to Canada? The thought arises from his announcement that on this tour, during which he will be seen at The Grand Theatre, Regina, on November 14, 5 and 6, he will make his farewell appearance as Sidney Carton in "The Only Way." In this role, in this splendid drama, Sir John has built up through many years a reputation that is probably unique in stage history. The confirmed theatregoer the final speech of this never-dwell character is probably as well known as the soliloquies of Hamlet, and all because Sir John brought his great ability to a part that could be less than mediocre in the hands of an actor of ordinary rank and merit. It is truly to be regretted that Sir John has decided to end Sidney Carton, for end it is, as there is unlikely to be anyone in this generation who will revive the role to the satisfaction of those who have seen the greatest of Sidney Cartons.

Sir John has made another of his surprising moves in adding for this tour "Rosemary" to his repertoire. This rare piece is a romantic drama of 1837, that makes an appeal to everyone. It is the story of the wholesome love of Sir Jasper Thorn-dyke, 40, for a young girl. It abounds in humor, pathos, and the general beauty associated with the gentle, kindly age it represents. As Sir Jasper, Sir John Martin-Harvey is seen at his best.

For the third play on his list, Sir John has gone to the modern Spanish. The title is "The Lowland Wolf." From the pen of Angel Guimerà, the play presents to Sir John a remarkable chance to show talents that have not been altogether displayed on his recent Canadian tours. He takes the part of Manelich, a shepherd of the mountains. The play has been translated into twenty-one languages, and so powerful an appeal has been made by Manelich to the Spanish people, that they have erected a statue to him in Barcelona. In Spain he holds rank with Hamlet. This will be the first time this epochal Spanish play has been seen here, and it should prove one of the most popular in which Sir John has ever appeared. For his present tour he has engaged splendid company, and it should be a farewell visit it will be one long remembered.

Forest Fire Fighting Methods

Specialty Designed Apparatus Found To Be Of Great Help

Forest fires in Canada, are to an increasing extent, being fought by specialty designed apparatus. Light gasoline fire-pumps have been put into use which will deliver a forceful stream of water through half a mile of hose. Fighting the fires at night is also greatly expedited by the use of lamps similar to those used by miners, which can be attached to the worker's cap and so enable him to keep on working during the hours of darkness at the very time when his work will have the greatest effect.

SUNDAY SCHOOL LESSON

SEPTEMBER 22

MALACHI FORETELLS A NEW DAY

Golden Text: "Behold, I send my messenger, and he shall prepare the way before Me." Malachi 3:1.
Lesson: Malachi 1:1 to 4:6.
Devotional Reading: Isaiah 11:1-10.

Explanations and Comments

The Coming Of The Lord In Judgment, verses 1-4.—In the preceding verse the prophet represents the people of Judah as complaining that the wicked please God, that God is not just in prospering them while they, the righteous, suffer. "Where is the God of Justice?" they ask. Now the prophet represents God as replying to them and encouraging them with a message of hope. "Behold, I send my messenger," the word "Malachi" means "my messenger"; it has probably become the title of the book because of its use here in this verse. "He will prepare the way before Me." Recall our lesson from Isaiah 40, whence this statement is thought to be borrowed. Zechariah (8:3), had promised that Jehovah would come to His temple, and our prophet assures the people that He, the messenger of the covenant, who is part of the covenant or agreement with His people, will suddenly come. The birth of Jesus is the sunrise of the Bible. Towards this point the aspirations of the prophets and the poems of the psalmists were directed by the heads of flowers are turned towards the dawn. From this point a new day began to flow slowly over

the world,—a day of faith and freedom, a day of hope and love. When we remember the high meaning that has come into human life and the clear light that has flooded softly down from the manger-cradle in Bethlehem of Judea, we do not wonder that mankind has learned to reckon history from the birth of Jesus, and to date all events by the years before or after the Nativity of Christ."—E. Vandyke.

"How wonderful the history of Israel—victor with God! First a band of westward emigrants, then a horde of escaped slaves, then a host of conquering warriors out of the desert; then crushed and ground into captivity; then, after seventy years, to return with songs and outburst of poetry, prophecy, and wisdom; then, after flowering in the Messiah, withered and dead down to the roots; then a new life was visible crushed and ground under Rome's empire, and scattered as dust to the winds—that is the story of the Hebrew people. And yet Israel's gift to the world is unique, deathless, unmatched in value. Out of Israel came the moral law, prophecy, the eternal word, the Teacher of nations, the Saviour of mankind, our Exemplar and Inspiration, the Word of God which liveth and abideth forever."—William Elliot Griffis.

Death Dealing Toxin

Dreadful Possibilities Of Use In Warfare Is Explained

The dreadful possibilities of a certain death dealing toxin in war time was mentioned by Professor Leonard Hill, in an address to the Sanitary Inspectors' Association, at Lowestoft, England.

Professor Hill called attention to "a certain bacilli which shall be nameless, but is easily cultivated."

"If men were as susceptible as guinea-pigs are to the toxin produced by this bacillus and there is reason to think they are, it would appear that one gramme, let us say a salt spoonful of the dry toxin would suffice to kill a million persons."

Prof. Hill said that the toxin acted if inhaled or if it touched the eye as a powder. He asked the association members "If men set out to prepare such a toxin and to scatter it by aeroplanes, what would be the use of the panoply of war."

It Will Prevent Ulcerated Throat

At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

Every two years a whale travels about 25,000 miles—the distance around the world—fish experts say.

Over 100 different languages are spoken in India.

WORLD HAPPENINGS BRIEFLY TOLD

According to Assessment Commissioner Farley, the population of Toronto this year showed an increase of 20,742, as compared with 1928. The figures are: 1929, 606,370; 1928, 585,628.

Coal, one of the few minerals which new Ontario's wealthy mining fields had long failed to show, has been discovered in vast quantities on the Abitibi River, 90 miles north of Cochrane, Premier Ferguson announces.

Hon. W. L. Mackenzie King, Canadian Prime Minister, is expected to make a tour of the West and British Columbia during October. Hon. Dr. J. H. King informed the committee of the British Columbia Liberal Association at Vancouver.

The government crop report issued by the Dominion Bureau of Statistics estimated the wheat crop for all Canada at 293,792,000 bushels. The crop last year was 566,726,000 bushels, which was a record crop for this country. The estimate for the three prairie provinces is 269,471,000 bushels. Last year the prairies produced 544,598,000 bushels.

Asthma Is Torture. No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Thousands do know how, from experience, how immeasurable is the relief provided by that marvelous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

If drivers would only get it into their heads that it is the reckless driver that we want instead of the reckless driver, all would be well on the King's highways.

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm Powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Willenden Magistrate: What is his occupation?

A Severe Attack of Dysentery Checked by 4 Doses

Mr. I. Burtonwood, 620-22nd St. W., Saskatoon, Sask., writes:—"My child, when only seven months old, had a very severe attack of dysentery, and after three days treatment with other things we decided to use On this day his bowels had moved twenty-three times in eleven hours, four doses checked it."

"A short time ago we offered it to a neighbor whose baby was troubled, and it too was relieved within thirty hours."

"We both always keep a bottle of Dr. Fowler's handy at all times. This medicine has been on the market for over 30 years; put up only by The T. M. M. Co., Ltd., Toronto, Ont."

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls say 10 ft. in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 150 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

USE WINDOLITE and let YOUR PLANTS YOUR CHICKENS BASK IN 100% SUNLIGHT Send for booklet "WINDOLITE"

Distributors: JOHN A. CHANTLER & CO., LTD. 51 Wellington St. W. TORONTO, ONT.

THE sun is the all-powerful life producer. Nature's rays are the most direct germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is the most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and the new being used in domestic and household requirements.

STATE CONTROL SUGGESTED FOR BROADCASTING

Ottawa. — Radio-broadcasting in Canada should be controlled and operated by a government-owned company. That is the effect of the chief recommendation of the royal commission which presented its report to Hon. P. J. Caudin, minister of marine and fisheries.

The company would have somewhat similar relations to the Dominion Government as the Canadian National Railways has, but would be distinct from that organization. It would have 12 members, three representing more particularly the Dominion Government, and one representing each of the provincial governments. The members of the commission were Sir John Aird, Toronto, chairman; Charles A. Bowman, Ottawa, and Dr. Augustin Frigon, Montreal.

The recommendations provide that the task of supplying the programs would fall upon the provincial representatives of the company.

The present owners of broadcasting stations would be reasonably recompensed when their plants were taken over or dismantled. The expenditure necessary for the operation and maintenance of the service should be met by license fees, rental of time on stations for programs employing indirect advertising and a subsidy from the Dominion Government.

High-power stations should be erected across Canada. As a nucleus to the publicly-owned service, seven 50,000-watt stations should be provided to give a good reception over the entire settled portions of the Dominion.

In making public the report, Mr. Caudin said he was well satisfied with the commissioners and their work.

The report will be submitted first to the technical officers of the department. Later it will go before the cabinet. To put the recommendations into effect would necessitate important legislation.

International Balloon Race

Ten Entries For the Gordon Bennett Event To Be Held Soon

St. Louis, Mo. — Ten balloons, representing the United States, France, Germany, Belgium, Denmark and the Argentine, will soar away from St. Louis, September 28, in quest of the international Gordon Bennett trophy. It will be the eighteenth of the international balloon races and the third to start from St. Louis. Seven of the races have been won by the United States, and five by Belgium, which gained permanent possession of the original Gordon Bennett trophy with its third straight victory in 1924.

The United States became permanent possessor of the second trophy with victories in 1926, '27 and '28. Now the third of the Gordon Bennett trophies is up, with three U.S. air men seeking to gain the first leg on it.

Heads Grain Exchange

Winnipeg. — William A. Murphy, vice-president of the Reliance Grain Company, Limited, was elected president of the Winnipeg Grain Exchange, succeeding James A. Crowe, who retired. Mr. Murphy was elected by acclamation. A. P. White, of the firm of Clark and Martin, and Ernest S. Parker, were elected vice-presidents.

Alberta Wheat Pool

Calgary, Alberta. — The Alberta Wheat Pool now owns 430 elevators spread over the length and breadth of the province. This is an increase of 135 over the number operated last year. The Pool now has facilities to handle approximately 90 per cent of all Pool wheat.

Steamship Disaster

Helsingfors, Finland. — The number of persons missing in the Kurur steamship disaster is officially stated to be 120, while an unofficial estimate is 145. Only 45 bodies have been recovered.

W. N. U., 1893

Forecast Dominion Election

Hon. Robt. Forke Says Elections May Be Held Within a Year

Winnipeg. — Within 16 months — and probably within a year — a Dominion election will be held, was the forecast of Hon. Robert Forke, Minister of Immigration, speaking before the Winnipeg Liberal Association here. The Dominion minister declared that the Liberal party would make gains in the Maritimes. Manitoba, he said, would be the keystone province.

"Why pay people to come to this country?" asked Mr. Forke. "Canada is a good enough country for people to come to of their own volition."

The matter of assisted passages required very serious consideration, the minister contended, for he intended to cut some of the assisted immigration afforded in the past.

No immigrant who paid his own passage has been deported. Mr. Forke pointed out, but all discontented immigrants sent back to Britain have come out under the assisted passage plan. "I still believe that there is room for everybody in Canada, but we want them to come here only when we can absorb them," he declared.

Jury Makes Recommendation

Unable To Establish Origin Of Fatal Winnipeg Fire

Winnipeg. — Stating that it was unable to definitely establish the origin of the fire that destroyed Prince Arthur Court on September 1, with the loss of nine lives and more or less serious injuries to 10 persons, a coroner's jury which has investigated the disaster has expressed the opinion that the building was not adequately equipped with means of escape in case of fire.

The jury recommends that proper authorities forthwith have a thorough investigation made of all buildings of three stories or more used as residences by three experts, including the fire chief, to secure their unbiased opinions and make recommendations for more adequate protection when necessary of occupants in case of fire.

Yukon Parcel Post

Service To Be Suspended During the Winter Months

Calgary. — Parcel post to the Yukon will be suspended during the season of closed navigation on the Yukon River, which extends approximately from October 1 to May 21.

During this period mail addressed to the Yukon will not be accepted unless directed to Champagne, Carcross and White Horse.

Permission to convey such mail as is offered by the public for carriage via air service from Prince George, B.C., to the Ingensia River in Northern British Columbia, has been granted to the Western Canada Airways of Winnipeg.

Special stickers will be sold by the company in payment of the special charge for air carriage.

Fanatics Behind Bars

Vancouver, B.C. — Chanting the weird Russian songs of their religion, 104 men and women with seven children, members of the Sons of Freedom sect of the Doukhobors, were quietly detained at Essondale, near New Westminster, and taken in buses to Okalla jail, where they began to serve sentences of six months for indecent exposure imposed at Nelson, B.C. The Doukhobors were arrested at South Slokan, on August 29, after staging a nude parade.

Want Disarmament Conference

Geneva. — The League of Nations was called upon by the Irish Free State to convene a general disarmament conference of the powers. Patrick McMilligan, foreign minister of the Free State Government, made the proposal. He expressed regret that 11 years after the close of the great war so little had been done to remove the weapons of war.

Study Wheat Prices

Washington. — Investigation of the disparity between Canadian wheat prices and the prices of wheat in the Northwestern States, together with a study of the subject of grain storage facilities, has been initiated by the Federal Farm Board.

IN AIRPLANE CRASH

Lady Mary Heath, noted English aviatrix, was seriously injured in an aeroplane crash at Cleveland. Her condition is reported as favorable.

Doukhobors Sent To Jail

Fifty-Nine Members Of Sons Of Freedom Aired Sentenced

Regina. — Ninety-six Doukhobors, men, women and children, self-styled Sons of Freedom, have been sent to Prince Albert. Of this number, 59 have been sentenced to serve six months in jail, while the remainder, consisting of 37 juveniles, 20 boys and 17 girls, will be handed over to the children's welfare bureau at Prince Albert.

Thirty-four women who disobeyed two miles east of Minkado on the highway, pleaded guilty of charges of indecent exposure. Two women and 43 men were convicted on a vagrancy charge, while no charge was laid against the juveniles.

Dress Reform Movement

Combination Trousers and Skirt Suggested For Universal Use

London, Eng. — The dress reform movement broke into the congress of the World League for sex reform on a scientific basis when a combination of trousers and skirt was suggested for universal use.

Dr. J. C. Lugel, of England, addressing the delegates of 11 countries, said that men possibly will adopt skirts and women trousers in the future, or more likely there will be a uniform combination for both sexes. He urged creation of a new mode of dress which would incorporate the advantages for both.

Soviets To Stay Out

Will Not Participate In Plans For An Economic United Europe

London, Eng. — An Exchange Telegraph dispatch from Riga states that the Russian foreign commissariat had declared the Soviet Union did not intend to participate in plans formulated at Geneva for an "economic united states of Europe."

The dispatch said the Soviet opposed schemes "tending to estrange Europe from America" and desires to remain neutral in the forthcoming economic struggle between the two continents.

Send Message To His Majesty

Business Men Meeting In Edmonton Send a Message Of Greeting

Edmonton. — A message of greeting from the 800 business men from all provinces, and representatives of five of the leading chambers of commerce of Great Britain, together with members of the Mother of Parliaments, was sent to King George at the opening of the fourth annual convention of the Canadian Chamber of Commerce. The message, signed by the president, William Birks, conveyed to His Majesty the rejoicing of the convention over the improvement in his health.

Messages of greeting from the Governor-General; Rt. Hon. Ramsay MacDonald, prime minister of Great Britain; Rt. Hon. W. L. Mackenzie King, prime minister of Canada; Lord Passfield, secretary of state for the dominions; Lord Ivesagh, president of the Federation of Chambers of Commerce of the British Empire, and from the premiers of various Canadian provinces, were read.

"It is the very earnest and confident hope of myself and of all my colleagues that the remarkable progress of Canada may continue at a rapid rate; and that the free, the happy and the mutually advantageous association which unites her with Great Britain may be strengthened," said the prime minister of Great Britain in his message.

Saskatchewan By-Elections

Dates Have Been Set For October 14 and 14

Regina, Sask. — Fixing of the dates of eight by-elections made necessary by the elevation of certain private members of the Saskatchewan Legislature to cabinet positions, calling of the first regular session of the legislature by the new government shortly after the first of next year, and decision to hold a provincial-wide Liberal convention next spring, are the three developments of the political situation in Saskatchewan.

Premier J. T. M. Anderson, announcing during the day the dates of the by-elections, stated the regular session of the legislature would not likely be called until after the first of the year. George Spence, in charge of the organization department of the Saskatchewan Liberal Association, made the announcement of the intention to hold a provincial-wide convention in the late winter or early spring.

The dates of the by-elections are as follows: Regina, Moose Jaw, Saskatoon and Lumsden, nominations on September 30, elections on October 7, Tisdale, Moosomin and Yorkton, nomination on October 7, elections on October 14.

MacDonald May Sail On 28th

New York. — In a special cable from London to the New York Times, the London Daily Express is quoted as saying that Premier Ramsay MacDonald has definitely decided to sail for the United States on September 28.

Sir Henry Thornton Bank Director

Montreal. — It is announced that Sir Henry Thornton, president of the Canadian National Railways, has been appointed a director of the Royal Bank.

LABOR PARTY WINS APPROVAL OF THE PEOPLE

London, Eng. — With Communist entanglements completely severed, the Labor party conference opening in Brighton, at the end of the month, is expected to devote the bulk of its attention to overdue reforms with the object of bringing the party constitution into line with modern necessities.

The executive's report proclaims that the Labor Government has seized the people's imagination. Events are being shaped with a vigor and spirit that is refreshing, it says, after the inertia of the past four years.

Answering the Liberal demand for electoral reform, the report says this clamor never was heard when the Labor party was struggling for existence.

The affiliated membership of the party dropped from 3,294,000, in 1927, to 2,077,000 last year, largely due, the report says, to difficulties arising from the Trade Union Act which compelled civil service organizations to discontinue affiliation, while in many instances new machinery for securing the "contracting" of party supporters had not yet been established.

Makes Important Discovery

Young Scientists Startles American Chemical Society With Demonstration

Minneapolis. — The splitting of a supposedly indivisible element, hydrogen gas, in two substances was demonstrated to the American Chemical Society here.

It was called the "greatest scientific discovery of 1929," by Dr. Hugh S. Taylor, of Princeton University, chairman of the session.

Dr. R. F. Bothooffer, a young German, who was a 17-year-old infantryman in the front-line trenches at the close of the world war, is the discoverer.

Dramatically he set his proof before the eyes of the chemists in a spot of light upon the wall of a University of Minnesota lecture room. Like a moving finger it wrote the forecast of a revolution in physical chemistry. The revolution was described enthusiastically by Dr. Taylor.

"It opens the way to finding an entirely new species of molecule. It is the first proof of something forecast mathematics. It means that our texts on physical chemistry will have to be re-written."

The discovery has no present commercial use, but the new world in chemistry it seems to open is very important.

Premier's Western Trip

Depends Largely On the Plans Of Ramsay MacDonald

Ottawa, Ont. — The western trip of Premier Mackenzie King this fall depends on a good deal on the plans of Premier Ramsay MacDonald, of Great Britain. Premier King stated that if Premier MacDonald visited Washington, he (Mr. MacDonald) would come to Ottawa at the conclusion of that visit. If the British prime minister came to Ottawa, Mr. King said he wanted to be here to receive him and discuss certain matters of interest to Canada and Great Britain. He expects that if Mr. MacDonald crosses the ocean it will be about the end of this month, or early in October. Mr. King will not go to Washington. He regards Mr. MacDonald's discussions there as entirely between the president and the premier of Great Britain.

Largest Western Port

Vancouver. — According to figures obtained by Canadian Pacific Steamships, Limited, the Port of Vancouver now ranks first among the ports of the Pacific coast. Outshipping San Francisco and Los Angeles in volume of inward and outward traffic and tonnage of exports and imports with a total of 9,899,787 tons of food imported into and exported from Vancouver in 1928, it surpasses all competitors, the nearest in line being Seattle.

Harry Saunders (left), engineer of the special Canadian Pacific Railway train that recently took E. W. Beatty, president of the railway, and several directors on a tour of the Maritime Provinces, and Charles Henderson, conductor on the train, represent between them just over a hundred years' service with the company. Mr. Henderson has put in 38 years of service, making him the dean of C.P.R. engineers; Mr. Saunders has a record of 48 years' railway service.

Sell yourself a Chevrolet

CHEVROLET owners sell themselves on Chevrolet. They learn, behind the wheel of the New Chevrolet, just what it means to drive a real six . . . a six with a high-compression valve-in-head engine, with staunch and stylish Body by Fisher . . . yet a Six at the price of a four.

They taste the joys of six-cylinder power and smoothness . . . six-cylinder snap and acceleration. They experience Chevrolet's marvellous comfort and handling ease. They discover that this amazing new Chevrolet gives them every modern convenience feature . . . such as twin-beam, foot-controlled headlights; finely upholstered, deep luxurious cushions; high-speed window regulators; Ternerstedt quality hardware; completely equipped, indirectly lighted instrument panel, including electric temperature indicator and theft-proof Electrolock.

When you are considering the purchase of a car sell yourself on the car you want. Get behind the wheel of the New Chevrolet and make your own tests. Then decide on Chevrolet only after you have proved to yourself that it offers you more for your money than any other car in the low-priced field.

"The World's Mine Oyster," Said Falstaff

EMPEROR OF
AUSTRALIA
LEAVING
NEW
YORK

JAPANESE DANCING GIRL

"Why, then the world's mine oyster which I with sword will open," said a famous character of Shakespeare, but the modern version relates to going around the world in a big and comfortable steamship with no sword to open the oyster. These are days of peace and world travelers now planning their tours will be interested to know that one globe-girdling liner will call at ports hitherto omitted from her itinerary—ports rarely touched by cruising steamers. The "Empress of Australia," a 21,550 gross ton vessel, long a favorite 7th globe trotter, will sail from New York December 1, 1929, on the seventh annual Canadian Pacific World

Cruise. Besides making her regular visits to the highlights of the Mediterranean, to India, Japan, China, Hawaii and other fascinating places, her itinerary this time has been extended to include Athens in Greece, Peking and Bangkok in Siam, with further calls at Keelung for Taku, in Formosa. She will be gone 137 days, visiting 81 ports and places in 24 countries. Athens is really three towns in one—the twisted lanes of the Athens that was little more than a Turkish village before the Greek War of Independence, the broad straight streets of the modern capital and the interesting ruins clustering round the Acropolis representing "the Glory that was Greece." The Parthenon, one of the most interesting ruins here, was chief among the buildings with which Pericles adorned the Acropolis about 460 B.C. Bangkok, the capital of Siam, was originally built on floating

pontoon or piles on the river's edge, but nowadays well-planned roads and streets radiate from the city in all directions, beautiful Buddhist temples are scattered all over the town, and the Royal Palace is one of the show places of Bangkok. Keelung, the chief port of the island of Formosa, is a hive of industry. Formosa is half the size of Ireland and is governed by the Japanese. In its northern fastnesses, still largely unexplored, lived the headhunters. The Japanese campaign of subjugation, however, has all but wiped out these barbarous people. The seat of government at Formosa is Taihoku. Here fleets of junks, manned by coolies, transport the visitors around the town, one of the chief attractions of which is the Governor-General's garden, where the world's most beautiful tropical plants bloom in exotic profusion.

The Singing Fool

By HUBERT DAIL
Copyright, 1922, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, the singing waiter and song writer at Blackie Joe's New York night club, is discovered by Marcun, the famous Broadway revue producer. Al insists, however, that the ballad singer at Blackie's, because he loves her, Molly, marry him, not loving him, and he pulls her up the ladder of fame. Meanwhile, Grace, the cigarette girl at Blackie's, who loved Al without his knowing it, is left behind. Molly has a baby. After her return to the stage her romantic interest in John Perry, Al's best friend, is revived. Al becomes part owner and master of ceremonies at the fashionable Club Bombo. On the third anniversary of their marriage he slips a jewel case under a napkin on her reserved table. Molly is in her limousine with John Perry on the way to the club. He pleads with her to throw over Al for him and suddenly kisses her.

CHAPTER XIII.

Brimming over with affection, Al greeted Molly as she entered the Bombo Club. Then he turned to Perry and said wholeheartedly: "Awfully good of you, old man, to take care of Molly while I'm working."

Perry had turned away to see if any vestiges of Molly's face powder still remained on his coat. Satisfied that he was safe, he turned his coat, hat and stick over to a check girl and acknowledged Al's thanks with an appearance of sincere cordiality.

They passed into the main dining room, Al leading the way. As they moved toward the reserved table, bewildering and contrasting thoughts flickered through Molly's mind. What a strange whirlpool of emotions had sucked her down! She felt the light caressing kiss that Al had given her in greeting still on her lips, but behind it, and much more intense, was the recollection of John Perry's embrace.

Now Molly and John Perry were seated at the table, while Al remained standing, watching his wife with intense curiosity. Why did he do that, she thought. Did he suspect something?

Al was waiting for her to lift her napkin. When she leaned back in her chair and made no move to do it he pantomimed definitely for her to look under the tiny square. Molly raised the napkin, saw the jewel case and card, and gave a cry of delight.

"Oh Al, this is wonderful of you!" With eyes sparkling and tenderly lifted from the padded silken interior of the box a magnificent diamond brooch. She drew it close, held it at arm's length, studied it carefully—while Al's face was radiant at her expression of delight. Then she passed it to Perry for inspection.

A moment later she was planning the expensive brooch to her dress, while Al turned and drew the attention of the crowd toward him.

"Folks," he said, "we have with us tonight none other than Molly Winston, the celebrated stars of the 'Merry-Go-Rounders'."

Then, with a proud gesture, he indicated Molly. Rousing applause was the answer of the crowd—a tribute to the girl's popularity. But Al raised his hand.

"Wait, folks!" he cried. "You ain't heard nothin' yet."

He seized Molly's hand and pulled her reluctantly to her feet. While she stood smiling and bowing to the audience he continued:

"And for the benefit of those of you who don't know it already, I want to say that Miss Winston is, in private life, my wife! Tonight we are celebrating the third anniversary of our marriage and—I want you all to congratulate us and be happy with us."

With that, Al suddenly slipped his arms around Molly, drew her close and kissed her. The roar of applause was deafening, twice the volume Molly received by herself. As she stood, with Al's arm around her waist, bowing again and again, there were insistent cries from the crowd that she give them a song. Molly nodded amiably.

"Will you sing for them, honey?" whispered Al.

"Yes, I don't mind."

Al tucked his arm comfortably under Molly's and led her toward the orchestra platform. The crowd waited silently, giving her every attention. At the table she had left, John Perry sat with his elbow on the table and his chin in his cupped hand, staring after her retreating figure. A vague smile played across his features. When the song was finished and Molly returned, Perry rose and said:

"That was splendid, Molly! I never heard you in better voice. You held them in the hollow of your hand."

"Thank you, John," said Molly quickly, but with pretended indifference. Then she turned to Al: "Can't you sit down and stay with us a while. Must you always be circulating among the customers?"

"I'll be back in a moment," whispered Al. "You know I want to be with you every moment I can. But, after all, I'm master of ceremonies." Molly shrugged her shoulders as he moved off. She had made her play for him to stay, but she was pleased he had gone off. Now she could talk to John.

"And you say you need him!" came Perry's whispered exclamation across the table.

"What do you mean?"

"Well, you heard the applause you got. You don't need him at all."

"Sh!" Molly drummed on the table-top without further words. The pink, polished nails of her white, be-ringed fingers went up and down with incredible rapidity. Too many rings on those slim fingers, too many glittering gems to be in the best of taste! How stridently they proclaimed her wealth and success! Molly glanced down at the brooch Al had just given her, as it reposed against the satin bodice of her gown. A few days before she had mentioned casually that she wanted a new brooch. Now—presto!—it was hers! But now, a few moments after Al had given it to her, it became just another costly ornament to add to her rich collection; the significance of the gift was lost on her.

A half hour passed, and Al returned to the table. Another half hour, and John Perry rose to go. "Fraid so," John answered. Now he was the one who thought of caution; he wished she wouldn't show her feelings so plainly before Al.

"Why?" she insisted. "If thought you'd run home with us for a while."

"Well, it's late for one thing. Besides, Molly, this is your anniversary. I know you and Al want some time alone together."

Perry spoke with the utmost gravity, but Molly thought she detected a sardonic gleam in his alert eyes. He was making fun of Al, and of her, too! For a moment she hated him for it. . . . But a moment later, when Perry had gone, she hated Al for creating the situation. Her thoughts, which had been bewildered, turned bitter. Anniversary indeed!

The Rolls-Royce sped rapidly toward home, with Molly keep-

They're Salted!

The Standard of Quality Since 1853

ing silent the whole way. Al, believed she was tired, remained numb, too, out of deference to her mood. When they entered the reception hall of the apartment Molly curtsy dismissed the maid and Al rushed off to the nursery, to see if Junior was sleeping.

The eyes of the young song-writer lit up with love for his baby son as he tip-toed across the nursery floor and surveyed the child, tucked safely away in bed. What a lovely picture Junior made, his mass of curls framing his delicate young face, his tiny woolly dog nestled beside him on the pillow.

As Molly entered she was struck by the scene. The expression on Al's face told more plainly than words his complete love and utter devotion to Junior. For a moment she remembered her behaviour of the evening and a throb of misgiving shot through her. She was unworthy and she couldn't hide it from herself. Only a great, unselfish love could give Al's face the expression of radiance it held now. She knew she could not achieve such a love and, suddenly, the realization brought a surge of furious anger within her!

(To Be Continued.)

Proposed Nicaragua Canal

The fate of the proposed Nicaragua Canal, stretching 183 miles through tropical mountains and forests from the Atlantic to the Pacific ocean, will depend on reports from a battalion of 400 engineers who were recently ordered to duty in the central American jungle to survey the route of the \$1,000,000 canal.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Extremator to drive out the parasites.

Fortune-Teller: You will suffer poverty until you are thirty-five years old.

"And then?"

"By then you will have got used to it."

A DOZEN different things may cause a headache, but there's just one thing you need ever do to get immediate relief. Aspirin is an absolute antidote for such pain. Keep it at the office. Have it ready in the home. Those subject to frequent or sudden headaches should carry Aspirin in the handy packet. Until you have used it for headaches, colds, neuralgia, etc., you've no idea how much Aspirin can help. It means quick, complete relief to millions of men and women who use it every year. And it does not depress the heart.

Aspirin is a Trademark Registered in Canada

Fallacies About the Moon

When Not Visible Kaffirs Say It Has Headache

The Dakota Indians think that the moon at its waning is eaten by mice. The Polynesians believe it is devoured by the spirits of the dead. The Kaffirs say that it wanes when, suffering from a headache, it puts its hand to its forehead and hides the latter from our view. The Eskimos imagine that the moon, harassed by savage retnes for a moment to take a rest and food.

A WARNING TO MOTHERS

Watch the Health Of Your Little Ones At All Times

No mother can expect that her child will escape all the ills to which babyhood and childhood are subject, but she can do much to lessen the severity of these troubles. The mother should be constantly on her guard to prevent childhood ailments, or if they come on suddenly as they usually do, to have the means at hand to relieve them. Thousands of mothers have found Baby's Own Tablets the ideal remedy for little ones—thousands of mothers always keep the Tablets in the house as a safeguard against the sudden illness of their little ones.

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels; sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fever and make the cutting of teeth easy. The Tablets are absolutely guaranteed free from injurious drugs and may be given to the youngest child with perfect safety. They are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Little Helps For This Week

"In Thy presence is fulness of joy." Psalm xl. 11.

O Friend of souls! 't is well with me whenever Thy love my spirit calms;

From sorrow's dungeon forth I flee, And hide me in Thy sheltering

The night of weeping flies away ' Before the heart-reviving ray Of love that beams from out Thy breast;

Here is my haven on earth begun; Who were not joyful had he known In Thee, O God! his joy and rest.

—Wolfgang Dersler.

We can even here be with God, so long as we bear God within us. We should be able to see without andness our most holy wishes fade away like sun-flowers, because the sun above us still forever beams, eternally makes new and cares for all. And we must not so much prepare for eternity as plant eternity in our hearts—sternly serene and pure, full of depth, full of light and all else.—Jean Paul Richter.

Education For Labor

Inauguration Of Workers' Educational Classes In Advanced In Manitoba

Inauguration of workers educational classes on lines similar to those which he said were flourishing in Great Britain, Australia, New Zealand and South Africa, was urged by R. J. Hall, of Swansea, Wales, at a conference with prominent Manitoba educationalists, Labor leaders, and government officials held at Winnipeg—Mr. Hall is a promoter of the scheme in the old country.

Hon. R. A. Hoey, provincial minister of education, thought it possible his government might be interested.

Stop Colds with Minard's Liniment.

Use Of Radium

Complete Potency Of Radium As a Cure For Cancer Not Substantiated

Warnings against undue optimism were sounded at the sixth annual meeting of the British Empire Cancer Campaign, presided over by the Duke of York. Sir Thomas Horder, physician in ordinary to the Prince of Wales, and physician to St. Bartholomew's Hospital, in presenting the annual report, said that the launching of the National Radium Fund might create in the minds of many people an unfounded belief in the complete potency of radium as a cure for cancer. Such a belief might have very unfortunate results for the patient if carried into practice in any case in which the growth was completely removable by operation. In the course of time radium might come to equal or even exceed operative measures in efficiency.

At present, however, it was the bounden duty of the doctor, in very many cases, in his patient's interest, to overrule his antipathy to surgical measures. All the same, the number of cases to which radium was applicable and the number in which brilliant results were achieved increased every year. But Sir Thomas added that it was open to considerable doubt whether many of the institutions that were advertising for money to purchase radium had upon their staffs men or women qualified to use it. It might even be necessary to employ some of the money collected in providing for such training in the use of a powerful but dangerous remedy.—Toronto Mail and Empire.

Hard and soft corns both yield to Holloway's Corn Remover, which is perfectly safe to use, and certain satisfactory in its action.

An essayist has discovered that two can live on three hundred pounds a year; but he omits to say two what.

Illness Kept Her From Work

"I took Lydia E. Pinkham's Vegetable Compound because I was so sick every month that I had to keep my bed for two days and I suffered so. I felt bad all the time. I had been working in a factory but for a long time was not able to work as I was so run-down and nervous. My friends told me of the Vegetable Compound. I am now sound and well and have gone back to work. I have a good appetite, my color is good and I am in good spirits."—Edna Baugher, 122 Adams Street, Moncton, New Brunswick.

INSTANT relief!

PUTNAM'S Corn Extractor

W. N. U. 1903

Stony Plain and District.

James Smith, formerly in charge of the P. P. detachment in Stony, spent a short holiday here on Saturday, renewing old friendships.

Mr W Samson returned on Monday night from a vacation spent at Jasper Park.

A gang from the new power company is working in Stony at present, preparing for the installation of the new system. The Main St. lighting system will be altered by the addition of several light poles on the north end. It is probable a few of the lights on side streets will be eliminated.

A wild goose-hunting party consisting of Messrs Henry Enders, E H Baron and John P. Miller, left Monday for Law water Lake, motoring out in the big red 'bus, with a trailer and punt. The party had pretty good luck.

Services will be held in St Philip's Church at 11 a.m. on Sunday, Sept. 22.

The Walther League members held their big Rally on Sunday last at St Matthew church, when the opening address was given by Mr W Rosnau; a talk on weekly Bible Study, by Rev E Eberhardt; obligations of W. L. in the district, Rev Boettcher; Why join the Walther League? by V J Kulak. A campaign is on the swing now to increase the membership in the local League.

Coming Auction Sales: Art Winters farm, Sat. Sept. 21; R N & H N Brumet, at Holborn, Wed. Oct. 2.

United Church Notes.

The Song service at Brightbank on Sunday afternoon last was a complete success. The Reform Church choir from Mewasin rendered four very beautiful selections under the leadership of their pastor. Mrs Peters sang a solo, and she and Miss Peters sang a duet. These numbers being much appreciated.

The pastor from Mowasin, Rev W C Boonert, gave a very able address on the relation of Music to Religion. The offering was sufficient to pay the balance due on the organ—in addition to \$4 for new window panes and several dollars toward the regular funds—about \$27 in all. The congregation was over 150, some of which had to gather about the door.

At Spruce Grove a reception of members was held during the service.

A very beautiful anthem was sung by the choir at Stony.

The Sunday School is planning for a big rally service and the Ladies' Aid for the annual Thanksgiving supper.

Spruce Grove News

Services will be held in the St Joseph church on Sunday Sept. 22, at 9 a.m.

Motorists are wondering when the new level crossing at Beuerlein's will be thrown open to the traveling public. It is noticed that a fence has been erected across it on the railway property.

Duck hunters motoring from the City were surprised when held up Monday morning on the road between Winterburn and the Grove by officers who asked to be shown drivers' licenses and, in cases where game was aboard, bird game licenses were inspected.

Very favorable comment is heard on all sides regarding the road work done in this Municipality the present season. Where the big outfit had been operating, the work is as good as the Government job, and the roadbed wider and safer.

The Fuhr threshing outfit is working along the North road, having just moved from the Uimer farm.

A quiet wedding was solemnized on Thurs. Sept. 12, at First Baptist church, Edmonton, when Dorothy, only daughter of Mr and Mrs Edward Ripley of Spruce Grove district, was united in marriage to Mr E. A. Porter of Calgary. Rev C F Stone officiated. The happy couple left on a honeymoon trip to Banff.

Carvel Clippings

Mr Thompson, on the Carvel road north, last week purchased a new Essex sedan from Agent G Oppertshauer.

Two of the road outfits from Wabamun moved down here on Friday, to help finish the new Baseline road.

The Police have been investigating the mysterious disappearance of 6 rolls of barb wire, a tent and various other articles which were lost to view a short time ago from a road-maker's camp.

R. C. services will be held here Sunday the 29th, at 11.

Duffield Doings.

The dance given here on the 11th was such a success, another popular dance was held here last evening by the Martins orchestra.

Peter Barehead, son of Mr and Mrs J Barehead, passed away in an Edmonton hospital Thurs. Sept. 12, aged 10 years. The funeral service was conducted by the Rev Bradshaw, and interment took place in the L. R. cemetery.

Golden Spike

The edifice was filled to capacity when Rev P Hanne-man preached his farewell sermon on Sunday last at the Golden Spike Lutheran church (Manitoba Synod). The Rev. gentleman's friends had come from near and far to wish him success in his new pastorate at Bashaw, to where he moves this week.

The threshers are busy now in the district, with a number of farmers pleased at wheat turning out better than was expected.

For Sale, 1928 Chevrolet Sedan, good as new; seen at Service Garage. Apply F B Connors, Est-wisla.

Here and There

Canadian Pacific steamers Minnedosa recently brought over to Canada two fine stations belonging to the Prince of Wales, "Aldebaran" and "Aldebaran", a Clyde, to go the royal ranch at High Ridge, Alberta. The two horses broke their journey at the Toronto Exhibition, and later were carried across the Dominion by Canadian Pacific Express. Special accommodation was provided for them on the Minnedosa.

Rt. Hon. L. C. M. S. Amery, secretary for the Dominions in the Baldwin administration, fulfilled his wish recently when he climbed Mount Amery, 10,340-foot peak in the Rockies, to accomplish which he had travelled some six thousand miles by Canadian Pacific Express of Australia and lines to Lake Louise from England. He fought his way through blizzards and many other hardships to the top of the peak. He was accompanied by a Swiss guide, Edward Feuz, of Lake Louise.

"Mr. Churchill looked very funny working on one of father's threshing machines," said the Hon. George Rodney, aged ten, who with his younger brother John recently travelled to Europe to take up schooling. Winston Churchill is a cousin of Lord Rodney who operates a ranch at Fort Saskatchewan, Alberta.

The fourth game refuge has been established in New Brunswick by the provincial government at Beauséjour, consisting of 45 square miles located in Carleton and York counties. This makes a total in all of about 640 square miles of territory set aside in the province as game sanctuaries since 1919.

Hon. J. L. Perron, Quebec minister of agriculture, has announced the loan of two-thirds of the purchase price of pure-bred sheep, without interest charges, to Quebec farmers. He aims to place 25,000 pure-bred sheep throughout the province to bring in a yearly revenue of \$250,000.

A yield of 3,599,995 barrels of apples is expected in Canada this year, as compared with 3,335,370 in 1926. Compared with the five-year average of 2,986,310 barrels this is an increase of 20%, making it a bumper crop.

Homestead entries in the four western provinces continue to run well ahead of last year. For the half year they number 7,125 as compared with 5,165 in the same six months period of 1926. Alberta topped the list with 4,053 filings; Saskatchewan followed with 2,381; British Columbia recorded 371 and Manitoba 355.

Sixty-three wells are being drilled in the Turner Valley. 30 miles south-west of Calgary, 21 are just about to be started and 28 are producing crude naptha or crude oil—a total of 112 wells. Mr. Winston Churchill, on his recent trip across the Dominion by Canadian Pacific paid a special visit to the Turner Valley accompanied by Mayor Osborn of Calgary.

Selection is announced of John W. Dufos, Editor of the Winnipeg Free Press, to act as a commissioner on the part of the United States on the International Commission under the Treaty for the Franco-American Government acting through Hon. William Phillips United States Minister to Canada. The International Commission now being set up by the United States and Germany is to have five members, of which Mr. Dufos is the first to be named. All disputes between the United States and Germany after ordinary diplomatic proceedings have failed are to be referred to the Commission.
